anikdasprivate@gmail.com | [LinkedIn](#) | [GitHub](#) | +8801849-587793 | [Portfolio](#)

Summary

AWS Certified Solutions Architect – Associate with a strong foundation in DevOps practices and cloud technologies. Hands-on experience with **Linux, GitHub, Docker, Ansible and Kubernetes**. Proven ability in deploying applications using containerization and orchestration tools. Passionate about automation, CI/CD, and cloud infrastructure. Eager to grow in a collaborative DevOps environment.

Experience

Magnus Corporation Ltd.

Jr. System Engineer

Nov 2025 – Present

- Providing L1 support for the OMS platform, ensuring stable system operations through proactive monitoring.
- Assisted in server/network deployment and troubleshooting under AMC & SLA commitments.
- Supported project execution by collaborating with senior engineers and managing documentation tasks.

Projects

- **Docker Based Developer Environment:** Built a cross-platform Docker-based development environment with VS Code integration, reducing setup time by 88% and ensuring consistent, isolated workspaces across Windows, macOS, and Linux.
- **Redis-based OTP Verification System (Dockerized):** Developed a Dockerized OTP verification system using Python (Flask) and Redis, generating secure 6-digit OTPs with 5-minute expiry and automatic deletion, deployable via Docker Compose with a web interface.
- **Secure Static Site Deployment on AWS:** Implemented a secure, serverless static website hosting solution on AWS using private S3, CloudFront with OAI, AWS WAF, CloudWatch Logs, and SNS notifications, ensuring content protection, monitoring, and alerting within Free Tier limits.
- **Serverless Image Resizing & Watermarking on AWS:** Developed a serverless image processing pipeline on AWS using S3, Lambda, DynamoDB, IAM, and CloudFront, enabling automatic image resizing, watermarking, metadata storage, and global content distribution.
- **AWS Serverless Resume Builder:** Built a serverless resume generator using AWS Lambda, API Gateway, S3, and CloudFront, generating dynamic HTML resumes as high-quality PDFs with Puppeteer and delivering them securely via S3 presigned URLs.

Skills

- **Cloud & DevOps Tools:** AWS, Azure, Docker, Kubernetes, CI/CD, Infrastructure as Code (IaC)
- **Scripting & Automation:** Bash, Git, GitHub
- **Operating Systems:** Linux (Ubuntu)
- **Web Technologies:** HTML, CSS, SQL
